EXPERIENCE

Waymo   **Feb 2018 – Dec 2019**
Software Quality Operations Specialist via Signature Consulting
- As part of the Large-scale Log Simulations team, performed safety evaluations, tested software, and filed bugs for level 4 autonomous vehicles
- As a team leader and mentor, used my data and communication skills to increase the triage rate, evaluation quality, and accuracy of recruits to expert level
- Adapted to rapidly changing tools and workflows while improving and teaching evaluation methods at a fast-paced startup

UC Berkeley Vision Science   **Nov 2017 – Feb 2018**
Research Assistant
- Used python to generate images from simulated aberrations in the human eye
- Processed data for experiments using VR to treat amblyopia with visual cues

Caring Dr   **May 2016 – Sep 2016**
Software Design and Development Intern
- Caring Dr is a startup that develops medical software solutions
- Developed a web app in javascript for doctors to treat patients with dementia
- Applied thoughtful UI principles to increase usability for mentally ill patients

---
